Index to Volume 64

	Issue	Page
2-D and 3-D interpretation of electrical tomography measurements, Part 1: The forward problem, V. Lesur, M. Cuer, and A. Straub	2	386
2-D and 3-D interpretation of electrical tomography measurements, Part 2: The inverse problem, V. Lesur, M. Cuer, and A. Straub	2	396
2-D gravity modeling with analytically defined geometry and quadratic polynomial density functions, B. Martín-Atienza and J. García-Abdeslem	6	1730
2-D ray-based tomography for velocity, layer shape, and attenuation from GPR data, J. Cai, and G. A. McMechan	5	1579
3-D inversion of gravity and magnetic data with depth resolution, M. Fedi and A. Rapolla	2	452
3-D moveout inversion in azimuthally anisotropic media with lateral velocity variation: Theory and a case study, V. Grechka and I. Tsvankin	4	1202
3-D moveout velocity analysis and parameter estimation for orthorhombic media, V. Grechka and I. Tsvankin	3	820
3-D preserved amplitude prestack depth migration on a workstation, P. Thierry, G. Lambare, P. Podvin, and M. S. Noble	1	222
3-D ray modeling by wavefront construction in open models, V. Vinje, K. Åstebøl, E. Iversen, and H. Gjøystdal	6	1912
3-D seismic stratal-surface concepts applied to the interpretation of a fluvial channel system deposited in a high-accommodation environment, B. A. Hardage and R. L. Remington	2	609
3-D seismic survey design for linear $v(z)$ media, C. L. Liner and W. D. Underwood	2	486
3-D structure below Ävrö Island from high-resolution reflection seismic studies, southeastern Sweden, C. Juhlin and H. Palm	3	662
3-D traveltime computation using second-order ENO scheme, S. Kim and R. Cook	6	1867
3-D traveltime computation using the fast marching method, J. A. Sethian and A. M. Popovici	2	516
A finite element method for computation of the regional gravity anomaly, K. Mallick and K. K. Sharma	2	461
A new kinematic method for mapping seismic reflectors, J. Zhe and S. A. Greenhalgh	5	1594
A new vertical continuation procedure for airborne electromagnetic field data from the modified image method, C. J. Bergeron Jr., J. R. Brusstar, N. Yi, Y. Wu, and J. W. Ioup	5	1364
A noise-optimized objective method for predictive deconvolution, S. C. Hornbostel	2	552
A quasi-Monte Carlo approach to efficient 3-D migration: Field data test, C. Zhou, J. Chen, G. T. Schuster, and B. A. Smith	5	1562
A refraction-seismic field study to determine the anisotropic parameters of shales, J. M. Leslie and R. Morin	4	1247
A side-by-side test of four land gravity meters, D. A. Chapin, M. F. Crawford, and M. Baumeister	3	765
A simplified Lax-Wendroff correction for staggered-grid FDTD modeling of electromagnetic wave propagation in frequency-dependent media, T. Bergmann, J. O. Blanch, J. O. A. Robertsson, and K. Holliger	5	1369
A theoretical comparison of equivalent-offset migration and dip moveout-prestack imaging, J. B. Bednar	1	191
Abgrall, R., Big ray-tracing and eikonal solver on unstructured grids: Application to the computation of a multivalued traveltime field in the Marmousi mode	1	230
Abma, R., Antialiasing methods in Kirchhoff migration	6	1783
Acoustic behavior at the fluid/solid transition of kaolinite suspensions, R. Esquivel-Sirvent	1	88
Aiken, C. L. V., see Hare, J. L.	1	78
Airborne gravimetry: An investigation of filtering, V. A. Childers, R. E. Bell, and J. M. Brozena	1	61
Airborne resistivity data leveling., H. Huang and D. C. Fraser	2	378
Amplitude-variation-with-angle behavior of self-similar interfaces, K. Wapenaar	6	1928
Amundsen, L., see Osen, A.	3	838
An analysis of deconvolution: Modeling reflectivity by fractionally integrated noise, M. M. Saggaf and M. N. Toksös	4	1093
An analytical expression for the gravity field of a polyhedral body with linearly varying density, R. O. Hansen	1	75
An improved method of determining near-surface Q, Y. Jeng, J. Tsai, and S. Chen	5	1608
An invariant representation for the magnetic transfer function in magnetotellurics, J. M. Romo, E. Gómez-Treviño, and F. J. Esparza	5	1418
An optimal true-amplitude least-squares prestack depth-migration operator, G. Chavent and R. Plessix	2	508
Analysis of multiazimuthal VSP data for anisotropy and AVO, W. S. Leaney, C. M. Sayers, and D. E. Miller	4	1172
Analyzing operators of 3-D imaging software with impulse responses, W. A. Schneider, Jr.	4	1079
Ander, M. E., LaCoste & Romberg gravity meter: system analysis and instrumental errors	6	1708
Announcements	1 4 5	313 1337 1663
Antialiasing methods in Kirchhoff migration, R. Abma, J. Sun, and N. Bernitsas	6	1783
Apparent AVA effects of fine layering, K. Wapenaar, A. -J. van Wijngaarden, W. van Geloven, and T. van der Leij	6	1939
Application of the Wiener-Hopf technique to the calculation of the diffraction of a cylindrical wave by a soft half-plane embedded in a fluid half-space, T. H. Tan	6	1847

	Issue	Page
Applying finite element analysis to the memory variable formulation of wave propagation in anelastic media, I. Kay and E. S. Krebes	1	300
Approximations to the Zoeppritz equations and their use in AVO analysis, Y. Wang	6	1920
